Well inspection

The RIEZLER cable drums are all suitable for use with our crawler systems as well as for the inspection of wells.

Push system expansion

In conjunction with a glassfibre rod the cable drums can also be used for push operation.

Popular sample configuration

As a full-value system for simple and mobile use the compilation of the control unit MSE-500 with manual cable drum KTM-150 and crawler FWL-100 is used by our customers over and over again.
